

THE ECLIPSE PERGOTENDA

Expand Outdoor Living For You and Your Business

The growing trend American consumers express is their desire to dine outdoors. Customers simply love the open environment, but as with any outdoor living space, you are subject to all the elements Mother Nature sends forth. Too hot, too cold, pesky insects, and rain can all force you to under-utilize this premium space. For commercial installations, you will be surprised at how quickly a Pergotenda system will pay for itself. No more canceled outdoor events!

Ideal for commercial applications!

# Eclipse SHADING PRODUCTS

WORLD CLASS SHADING SYSTEMS

## THE PERFECT ADDITION TO YOUR OUTDOOR LIVING DECOR

Eclipse offers a complete line of retractable shading systems for your home or business. Our “green” products will reduce your cooling costs, expand your living space and add style and color. Eclipse shading systems are individually crafted to meet your unique and specific shading needs – with virtually millions of combinations; no two units we produce are the same.

### BUILT TO YOUR SPECIFICATIONS

Your independent Eclipse dealer is a shading expert who will design and install products that are both beautiful and functional. We assemble our products right here in the USA using the finest components from around the world. Using state-of-the-art equipment and the latest technology, our skilled craftsmen and assemblers build every unit from scratch typically in less than 7 days from the date of order. This express production schedule allows your Eclipse dealer to normally install your awning within 3 weeks or less.

### ECLIPSE E-ZIP

#### Side Fabric Retention System

The Eclipse E-Zip retractable shading system provides easy, touch of a button control for expanded living space. Your custom made, professionally installed shading system will provide on-demand control of the sun's glare and harmful UV rays. Your E-Zip units can also control rain and wind from entering your porch or patio area. The Eclipse E-Zip, a side retention track screen, will allow you to create a virtually bug proof environment with a touch of a button.

### THE ECLIPSE

#### Uniquely Designed And Built To Meet Your Needs

Every Eclipse shading system is custom made and professionally installed to meet your unique needs. The Eclipse is an ideal solution to expanding the living space of virtually any deck, patio or terrace. The Eclipse features a 10 year frame warranty and is our most versatile shading system.

## THE TOTAL ECLIPSE

### When Bigger And Better Is Just Right For You

The Total Eclipse offers unequalled strength and durability for both residential and commercial use. The Total Eclipse, which carries a 10 year frame warranty, features unit components that are up to 50% larger than our Eclipse system and can project up to 16'6" – the largest in the industry!

## THE PRESTIGE CASSETTE

### Architecturally Designed For Unsurpassed Strength and Style

The Prestige is a modular "full cassette" shading system that is designed to fully protect the unit when retracted. The compact design and clean European inspired lines allow the Prestige unit to be mounted on most surfaces and architecturally blend harmoniously with your home.

## THE SUNROOF PLUS

### Designed and Engineered For Greater Protection From The Elements

The Patio style is designed to attach to an existing wall and incorporates a front crossmember and matching powder coated aluminum posts. The Pergola style is designed to mount on top of an existing structure such as a free standing pergola or over a sunroom.

## THE ULTIMATE ECLIPSE

### The Ultimate In Function And Form

Are you ready to step up to the finest in retractable shading? The Ultimate is our pinnacle product built on many industry leading unique patents. The Ultimate is ideal for both commercial and residential applications and carries a LIFETIME frame warranty. A semi-cassette hood option, which protects the entire fabric when retracted, is available up to 22' wide with projections up to 13'. The sleek yet rugged framework will provide you with years of trouble free solar protection.

## THE ECLIPSE DROP ARM

### Reduces Cooling Costs And Sun Glare

The Eclipse Drop Arm shading system is ideal for windows, porches or any opening where you desire to stop direct sunlight. The Eclipse Drop Arm will reduce interior fading & cooling costs while adding privacy and style to your home. When not in use or when warming sunlight is desired, the Eclipse Drop Arm is fully retractable. No seasonal take down needed like traditional style window awnings. The Eclipse Drop Arm comes with a 10 year frame warranty.

## EXTERIOR SCREENS

### Maximize Your Energy Savings

Exterior mounted screens greatly reduce solar heat gain by stopping the effects of the sun before they enter the home, lowering room temperatures up to 20 degrees! Eclipse screens will also add privacy and security to any location. Eclipse screens are fully custom made in a wide variety of fabrics and options to best fit your unique needs. Most Eclipse exterior screens incorporate an aluminum extruded cassette housing which stores the fabric when retracted, allowing full access through the opening. Depending on your mounting services, these units can be installed with side tracks, cables or a combination of both to guide the hem bar and fabric.

## INTERIOR ROLLER SHADES

### Retractable Sunglasses For Your Windows

Eclipse shades are a “green” way to reduce room temperatures, save energy, eliminate sun glare and stop the fading of your personal effects. Eclipse offers several models of interior mounted retractable shades that can be manually operated or motorized. For maximum efficiency, electronic light and temperature sensors can be incorporated. Eclipse shades feature GreenGuard® certified fabrics that are ideal for any residential or commercial location.

## THE ECLIPSE PREMIER

### Improve on a Classic

The Eclipse Premier takes our most popular model, the Eclipse unit, and upgrades many key frame components for smoother operation and a sleeker look. The heavy duty aluminum torsion bar, next generation arms, along with redesigned, stronger arm shoulders allow the Eclipse Premier to combine European cutting edge performance with an American classic. The Eclipse Premier also includes our Platinum Protection Warranty at no additional cost.
